

DevOps Engineer- AMANA

MENA's leading trading and investing destination

Major: degree in Computer Science, Computer Engineering, or any related field

Experience: 5-8 years of experience working in Azure DevOps role

Major Responsibilities:

- Design, implement, and manage CI/CD pipelines using Azure DevOps and GitHub Actions.
- Automate infrastructure deployment and management using Infrastructure as Code (IaC) tools such as Terraform and YAML.
- Develop and maintain infrastructure automation scripts using PowerShell and Python.
- Implement, deploy, and maintain Spark jobs.
- Manage deployment and maintenance of Power BI deliveries.
- Monitor, troubleshoot, and optimize system performance using system monitoring tools and best practices for infrastructure health.
- Ensure high availability and scalability of cloud infrastructure and applications.
- Collaborate with development, operations, and security teams to ensure seamless integration of infrastructure and applications.
- Use version control and source code management tools to manage infrastructure changes.
- Implement and maintain cloud security and networking practices to safeguard infrastructure and applications.
- Own the Azure (DevOps) infrastructure and implement improvements
- Design and deploy containers using Docker & AKS
- Review of existing CI/CD Pipelines and IaC, best practice recommendations and implementation of starter CI/CD pipeline to deploy IaC

Additional Requirements:

- Strong hands-on experience with Azure DevOps and GitHub Actions for CI/CD pipeline automation.
- Proficiency in Infrastructure as Code (IaC) tools such as Terraform, YAML, and other declarative infrastructure automation frameworks.
- Solid experience with scripting languages like PowerShell and Python for automation and infrastructure management.
- Good understanding of Azure security, networking, and cloud operations.
- Solid experience with Linux.
